

# InfiLINK XG 1000

**InfiLINK XG 1000** is a brand new range of products that accommodates escalating requirements for speed, reliability and flexibility. It can provide throughput of up to 1 Gbps over the air in 5 GHz license-free frequency bands. **InfiLINK XG 1000** was specifically designed to deliver superior performance over long distances and in extremely adverse environments including nLOS and NLOS scenarios. The InfiL-INK XG 1000 family units harmoniously complements the **InfiLINK XG** and enables to meet accelerating demand for cost-effectively capacity under rapidly evolving conditions.

InfiLINK XG 1000 uses two non-adjacent channels that gives a great advantage compared to 802.11ac systems. Available with a wide range of integrated antennas, as well as a connectorized version for use with 3rd party external antennas, the InfiLINK XG 1000 family is the ideal choice for a large array of applications such as backhaul in the telecom market, education, oil and gas, smart cities, video surveillance and public safety. It was designed by Infinet Wireless to meet the exact requirements of the most demanding customers, most complex projects and most challenging environments.
